Severe Weather Outlook Tuesday, October 09, 2018

National Weather Service
Storm Prediction Center

<http://www.spc.noaa.gov>

Hazardous Weather

Flood Watch has been Extended

through midday today over the Rolling Plains

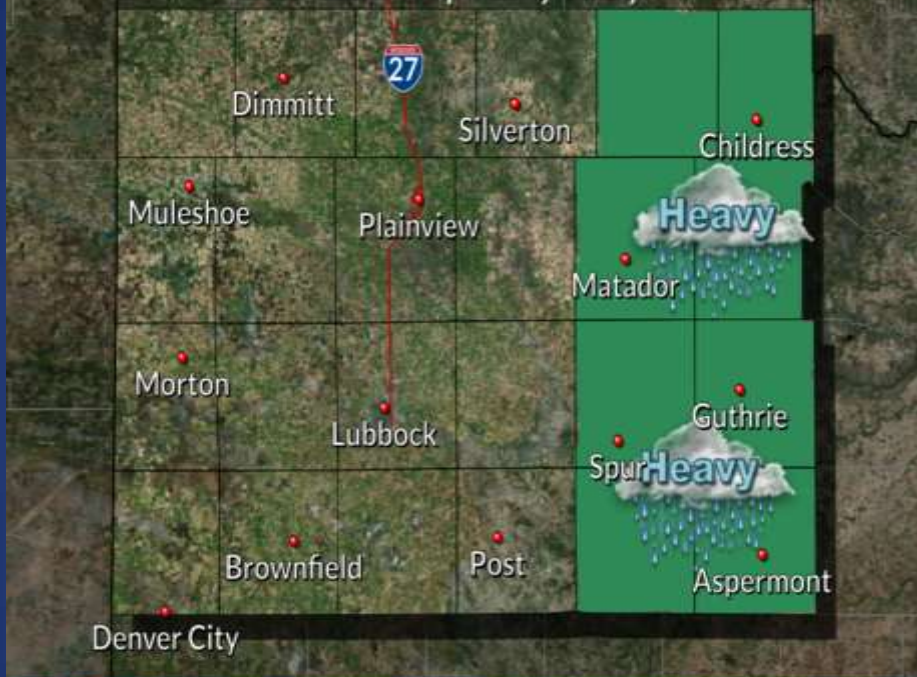

Weather Forecast Office

Lubbock, TX

Issued Oct 09, 2018 3:05 AM CDT

Rain will taper off by midday

NWSLubbock

weather.gov/lub

The Flood Watch has been extended through 1 pm this afternoon across the Rolling Plains. Additional rainfall through midday could cause flooding concerns, especially following periods of heavy rain the past several days.

Flash Flood Watch

Continues across the Heartland and Hill Country

Weather Forecast Office

San Angelo, TX

Issued Oct 09, 2018 7:39 AM CDT

WHEN:

- Through 3 PM Today for Coleman, Brown, McCulloch, San Saba, and Mason Counties. This includes the communities of Brownwood, Coleman, Brady, San Saba, and Mason

WHAT:

Widespread showers and storms moving east across the area this morning.

IMPACTS:

- Heavy rainfall may lead to rapid runoff which could result in flooding of low water crossings and city streets. Creeks and streams will fill with swiftly flowing water.

When Road is Flooded,
Turn Around, Don't
Drown!

NWSSanAngelo

weather.gov/sjt

The heavy rain is shifting east across West Central Texas this morning, with the main threat east of a Coleman to Brady to Mason line. This area will see widespread heavy rainfall.

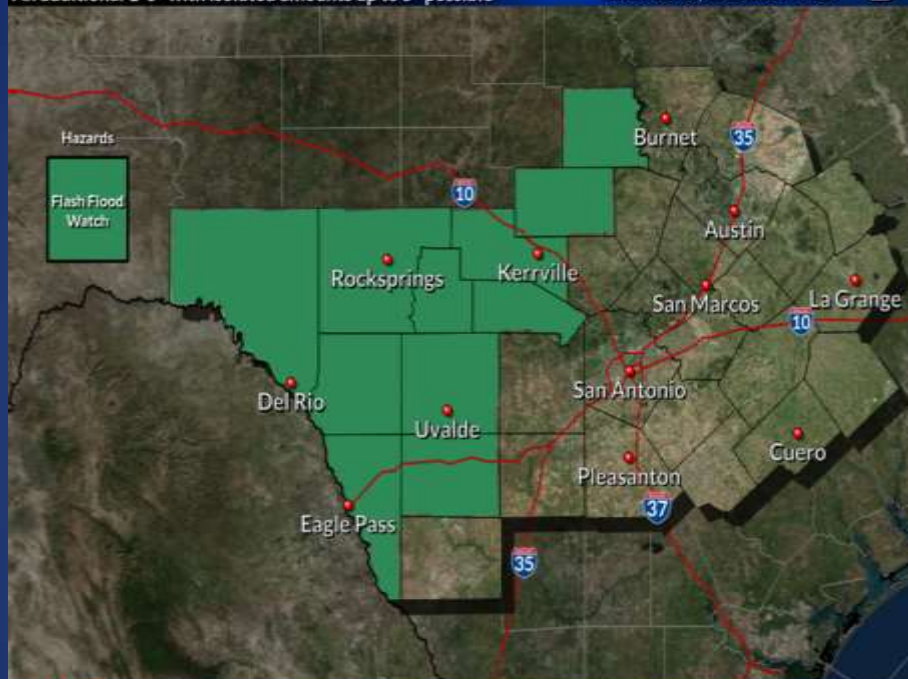

Hazardous Weather

Flash Flood Watch through Tuesday Morning

An additional 1-3" with isolated amounts up to 5" possible

Weather Forecast Office
Austin/San Antonio, TX

Issued Oct 08, 2018 2:30 PM CDT

[f](#) [t](#) [v](#) NWSSanAntonio

weather.gov/ewx

An approaching upper level trough and ample moisture will combine to produce showers and thunderstorms today across portions of the Rio Grande Plains, Edwards Plateau, and Hill Country. Additional rainfall amounts of 1 to 3 inches, with localized amounts to 5 inches are possible. These rainfall amounts may cause flash flooding.

Severe Weather Risk

Valid through Wed 7:00 AM CDT

Weather Forecast Office

Shreveport, LA

Issued October 9, 2018 2:42 AM CT

[f](#) [t](#) [v](#) NWSShreveport

weather.gov/shv

There is a slight risk for severe thunderstorms across Northeast Texas, Southeast Oklahoma, and adjacent sections of Southwest Arkansas late Tuesday Afternoon through Tuesday night. Damaging winds and isolated tornadoes are the primary threats should these storms become severe. The severe weather threat should diminish after midnight Tuesday night as they enter Southwest Arkansas and Northwest Louisiana.

Hazardous Weather

Heavy Rain & Flooding To Continue Today

Weather Forecast Office
Norman, OK
Issued Oct 09, 2018 3:45 AM CDT

f t NWSNorman

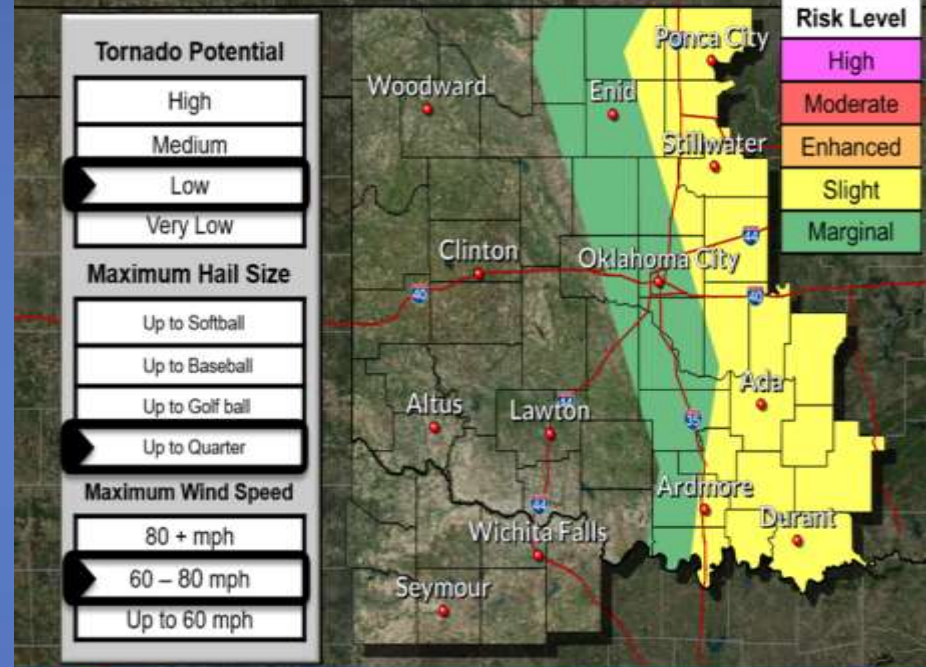

weather.gov/norman

Heavy rain and flooding will continue today but will shift east.

Severe Storms Possible Tuesday

Afternoon and Evening

Weather Forecast Office
Norman, OK
Issued Oct 09, 2018 8:01 AM CDT

f t NWSNorman

weather.gov/norman

Some strong to severe storms will be possible this afternoon and evening.

Hazardous Weather

Tracking A Storm Complex This Morning

6:40 AM Radar Imagery

Weather Forecast Office
Fort Worth, TX
Issued October 9, 2018 6:44 AM CT

f t NWSFortWorth

weather.gov/fortworth

We are tracking a complex of storm as it moves east/northeast this morning. Strong to severe storms possible and periods of heavy rainfall that may cause some flooding. Here's the latest timing on the leading edge of the storm. Stay weather aware

This Afternoon/Evening

Severe threat continues.

Weather Forecast Office
Fort Worth, TX
Issued Oct 09, 2018 4:24 AM CDT

- A line of showers and storms is expected to push east of I-35 this afternoon.
- The severe weather threat will continue, mainly along and east of I-35/35W.
- There is a chance that an additional line of storms develops near I-35/35W this evening. These storms could also become strong to severe.

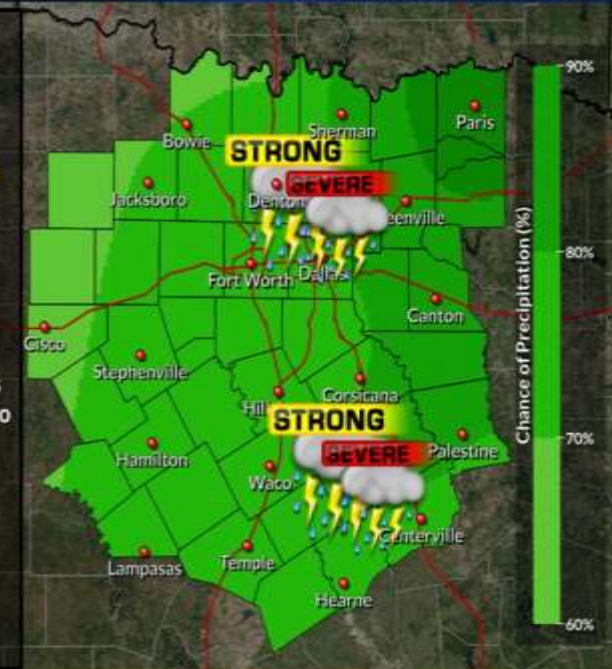

Main threats:

- Damaging wind gusts
- A tornado or two
- Heavy rainfall

f t NWSFortWorth

weather.gov/fortworth

The morning line of storms will continue pushing east this afternoon but is anticipated to weaken and possibly dissipate somewhere east of I-35. However, a threat for strong or severe storms will continue before the line weakens. A secondary round or line of storms may form near or east of I-35/35W later today and move east through the evening hours. These storms could also become strong to severe. Damaging winds will be the main hazards but an isolated tornado will also be possible. Heavy rainfall may cause flooding issues.

Hazardous Weather

A combination of hurricane Michael heading towards the panhandle of Florida pumping deep moisture into our area and an upper level trough pushing in from the northwest will keep rain chances in the likely category today. Highs will be in the mid 80s with southeast winds 5 to 10 mph. With Michael pushing northward, tides will be running 2 feet above normal. This will lead to the potential of coastal flooding.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
10/08/18	Flood Warning	Elm Fork Trinity River Near Carrollton affecting Dallas County; Guadalupe River at Hunt affecting Kerr County; Llano River At Llano affecting Llano County; Llano River Near Mason 2ESE affecting Mason County; Nueces River At Laguna affecting Uvalde County; White Rock Creek Near White Rock Creek At Greenville Ave affecting Dallas County; Hockley, Lubbock and Swisher Counties
